Good Morning DNR Director Lyon,

Hope your doing well, we are -6 below zero with 6 inches of snow here today, and it's not even mid November yet.

I was just following up on my Certified letter that is attached, I sent to you on September 4th and was received by your department on Sep 9th, 2019.

Your NO response says that your agency does agree to all the issues I mention in the letter of the right of all Iowans to protect their property by removing at any time any destructive state animals including Whitetail Deer.

Current Iowa deer hunting rules are not designed or effective to protect our property year around from destructive deer.

Again if your agency, or my county attorney Jeff Renander feel that I or any Iowan have violated any state laws, when we remove destructive state animals, at any time to "protect property" to let me know immediately. I will let your agency do any program on my property that would stop the deer damage, as long as your agency agrees to pay me for any damage that would occur while enrolled in your program.

If your agency does not respond to this E-mail, I will consider this issue closed and will not contact you again.

Sincerely,

Kevin Kelly
